

DIAMOND HAND PADS

Alpha[®] Diamond Hand Pads are used to perform convenient, on-site polishing, on materials such as glass, ceramics, marble, granite, concrete, terrazzo and quartz surfaces. This system is available in two bond types to provide the best possible finish. **May be used for wet or dry applications.*

ELECTROPLATED GRITS:

This type of pad uses nickel plating technology to hold each individual diamond in place and is available in 60, 150, 300 and 500 grits.

RESIN GRITS:

This type has a finer diamond grit than electroplated pads. The resin bond is coated on a special backing material and is available in 1000, 2000 and 3000 grits best suited for honing to polishing.
