## \* ALPHA® VSP-320

- No-Load Speed:** The Alpha® VSP-320 is the only one in the industry that is designed for continuous low RPM polishing of Engineered Stone/Quartz Surface to avoid any burning of the material.
- Water Hose:** Alpha® provides the longest water hose with a faucet/garden hose connector with the purchase of the polisher; other manufacturers have a shorter hose or they don't even provide a water hose. The Alpha® hose is Kink Free and Very Flexible as well as All-Weather usage.
- Power Cord:** Alpha® provides the longest electrical cord with a GFCI attached.
- Splash Guard:** Alpha® is the only manufacturer that provides a splash guard which can be adjusted to the end-users' needs.
- EasyOn-EasyOff Sleeve:** Alpha® is the only manufacturer that provides this sleeve to cover the power cord and water line which improves maneuverability while polishing.
- Spindle Lock:** Alpha® enhanced the thickness of the spindle shaft to accept a full size wrench (included with VSP-320 purchase) to protect the bevel gear instead of using a spindle lock button.
- Ventilation Cap:** Alpha® is the only manufacturer that provides this ventilation cap to divert water from entering the polisher during vertical polishing.
- Gear System:** The Alpha® VSP-320 has a heavy-duty gear system that includes a step-down transmission to maintain a continuous variable speed range of 700 to 2,500 RPM.
- Speed Pot Feedback Sensor:** The Alpha® VSP-320 is equipped with a Closed-Loop Feedback sensor that will re-adjust the RPM to maintain a constant speed when a load is applied to the polisher.
- Service Center:** Alpha® is the only manufacturer which provides an on-site service center in the US for the polishers.
