

How To Use

Porcellana

Mount the Alpha® Porcellana blade onto the appropriate power tool designed for the blade diameter:

- o 4-3/8" diameter blade will fit the Alpha® AWS-110, AWS-125 or 4-1/2" Angle Grinders.
- o 5" diameter blade will fit the Alpha® AWS-125 or 5" Angle Grinders.
- o 7" diameter blades will fit onto tile saws.
- o 8" diameter blades will fit onto tile saws.
- o 10" diameter blades will fit onto tile saws.

When mounting the blade onto the power tool, make sure the blades directional rotation matches the spindle rotation of the power tool.

Step-cutting is recommended to enhance the life of your blade.

Always make sure the power tools safety guard is mounted onto the tool. If the blade doesn't fit with the safety guard on the tool, you're probably using the wrong size power tool.
