## Dry Tile Cutting System

Once again, Alpha® has set a new standard by introducing a dry tile cutting system for the tile installer which is virtually dust-free! Using this new EcoCutter system with the included Alpha® Katana blade, you can cut most tiles clean and fast, including porcelain, without water, thus eliminating messy clean up.

The lightweight cutting table and stand are included, allowing the installer to easily carry and store in a truck. The table is designed to hold 1/2" thick tile and can cut a diagonal on 20"x 20" tile or smaller.

Designed with the tile contractor in mind, the EcoCutter is the ultimate dry cutting system!

**Kit Includes:** EcoCutter, Stand, Table, 5" Katana Blade and Basic Instructional DVD

Specifications:	Equipment Included:
