General Purpose Flat Grinding Disc

The Vextra grinding disc is designed for removing rust, burrs, mill scale, and paint on various surfaces as well as epoxy, glues and adhesives without clogging the grinding surface. It can be used on natural stones, engineered stone/quartz surface, wood and rubber as well as steel, stainless steel and non-ferrous metals for the Ex ZONE where spark reduction is a priority. The sandwich construction with rubber makes the grinding disc light, reduces vibration and noise to reduce fatigue of an operator. The Vextra has an optimized diamond grit and layer arrangement offering a long life and consistent performance without downtime. You can maximize the wheel coverage by grinding flat to improve productivity and efficiency. The Vextra grinding disc is available in 4.5", 5" and 7" with 7/8" arbor or with a 5/8"-11 zinc hub.
