

How To Use

Quad

Mount the Alpha® Quad blade onto the Alpha® BAH-5/8 or FAH-5/8 adapters. Place the blade on the appropriate adapter making sure the countersunk holes drilled into the blade are facing upward. Align the hole pattern of the blade together with the hole pattern of the adapter and insert the countersunk screws. Tighten the screws using a screwdriver, making sure the heads of the countersunk screws are level with or below the level of the blade core.

The Alpha® Quad blade is now ready to be placed on an angle grinder rated for the diameter blade being used.

Always refer to the operation manual of the power tool for correct mounting procedures.
